TERMS AND CONDITIONS

- Permits or Approvals granted by the Nottawasaga Valley Conservation Authority are **non-transferable**.
- Permits, approvals, etc. may be required from other agencies prior to undertaking the proposed work. Authority permission, if granted for the proposed work, does not exempt the owner/agent from complying with any or all other laws, statutes, ordinances, directives, regulations, approvals, etc. that may affect the property or the use of same.
- If the information provided on or with this application is determined to be untrue or incorrect, or become untrue or incorrect, the Nottawasaga Valley Conservation Authority reserves the right to withdraw any permission granted.
- Permits contain important conditions. Contractors must have a copy of the permit on the work site at all times.

Owner Applicant Authorized Agent

Your application MUST be accompanied with the following

- Payment of the applicable application review fee
- A Location or road map to your development
- A Site Plan drawing (birds eye view of the land) showing the proposed works, your property boundaries and features of the site such as other buildings & structures, tree lines, streams, wetlands, wet areas, springs, ditches, culverts, elevation contours or existing and proposed grades. **Include measurements and dimensions!** Show how much vegetation or tree cover is to be removed and where fill is to be placed
- The elevation of existing buildings, if any, and grades and the proposed elevations of buildings and grades after development.
- Lot grading and drainage plan (drainage details before and after development)
- A complete description of the type of fill proposed to be placed or dumped
- The proposed use of the buildings and structures following completion of the development. For a watercourse alteration, statement of the purpose of the alteration
- Construction sequence (a description of the methods to be used in carrying out the works, more important for watercourse alterations)
- The location and extent or perimeter of all proposed works should be staked out or flagged or marked in some way so we can easily locate it on your property when we visit
- Prepare plans or describe how sediment and erosion will be controlled during construction and for the period after construction until vegetation is established
- A copy of any studies or reports undertaken for the proposed work (example: Flood Study, Environmental Impact Study, Hydrogeological Report, Geotechnical Study, Slope stability Analysis, Fisheries Impact Assessment, etc.)

The following may also be required to support your application, which could expedite the permit review process

- A legal survey
- A cross-section drawing (what the work will look like from the side). Your contractor can shoot the grades of the work site with a survey leveling instrument
- A topographic survey tied into a geodetic benchmark or based on a known ground elevation, may be requested for some types of works. (Such as building on the shoreline of Georgian Bay)
- A written description or drawings showing the materials to be used and the proposed specifications, measurements or sizes of things such as culverts or rock protection
- Conceptual, architectural or design drawings of the proposed building(s)
- A written description or diagrams of how the work is to be done and how the site will be accessed by heavy equipment
- Prepare plans or describe how the site is to be re-vegetated after construction, such as sod, seeding, hydro-seeding, tree & shrub plantings
