# **FLOOD ADVISORY**

---

**ISSUED February 14, 2009 (11:30 AM )**

Issued to the following groups:

- 1) Municipalities and Local Conservation Authorities
- 2) School Boards and Police
- 3) Media
- 4) Conservation Authority Chair, Vice Chair & C.A.O.

**The Nottawasaga Valley Conservation Authority advises that all watercourses upstream of the Minesing Wetland are receding. Flows in the lower Nottawasaga will increase for the next few days as the flood wave moves through the Minesing Wetland. High flows will continue through the weekend and low lying areas throughout our region will continue to be flooded.**

The current weather forecast is for temperatures to stay below the freezing mark and no precipitation.

The public and especially children are advised to stay away from all area water bodies as unstable ice conditions, slippery banks and cold water may result in a life threatening accident.

Municipalities within the watershed need to monitor watercourse conditions closely until flows subside. The Nottawasaga Valley Conservation Authority will continue to monitor river conditions and will issue updated flood messages as conditions warrant.

This warning will be in effect until Tuesday, February 17, 2009.
