# ***HIGH WATER SAFETY BULLETIN***

---

**ISSUED March 11, 2009 (10:30 AM)**

Issued to the following groups:

- 1) Municipalities and Local Conservation Authorities
- 2) School Boards and Police
- 3) Media
- 4) Conservation Authority Chair, Vice Chair & C.A.O.

**The Nottawasaga Valley Conservation Authority advises that the High Water Safety Bulletin issued March 8, 2009 is extended. Some flooding of low lying areas will continue and public safety is emphasized.**

During the past 24 hours our watershed has received between 7 and 12 millimetres of rain. The additional rain will cause water levels and flow conditions in our watercourses to remain high for the next several days.

The current weather forecast indicates a return to freezing temperatures which will slow runoff; however flows will remain high as the runoff moves through the watershed.

The public and especially children are advised to stay away from all area water bodies as fast flowing water and slippery banks will result in extremely dangerous conditions.

The Nottawasaga Valley Conservation Authority continues to monitor river and stream conditions and will issue additional messages as conditions warrant. This bulletin will be in effect until Friday, March 13, 2009.

*For additional information, please call 705-424-1479, pick "1" for the flood information line or check our web site at: [www.nvca.on.ca](http://www.nvca.on.ca)*
