

HIGH WATER SAFETY BULLETIN

ISSUED May 29, 2009 (9:30 AM)

Issued to the following groups:

- 1) Municipalities and Local Conservation Authorities
- 2) School Boards and Police
- 3) Media
- 4) Conservation Authority Chair, Vice Chair & C.A.O.

The Nottawasaga Valley Conservation Authority advises that the High Water Safety Bulletin issued May 27, 2009 is extended. Flows on area watercourses will maintain current levels for the next few days. Public safety near the watercourses remains the focus.

During the past 3 days our watershed has received between 15 to 75 mm of rain with the highest concentrations in the south (headwaters).

Current forecasts are for potentially more precipitation in the form of isolated thunderstorms until Sunday.

The rainfall has increased the flows in our watercourses. The flows are expected to remain at these levels throughout the week-end.

The public and especially children are advised to stay away from all area water bodies as fast flowing water and slippery banks will result in dangerous conditions.

The Nottawasaga Valley Conservation Authority continues to monitor river and stream conditions and will issue additional messages as conditions warrant. This bulletin will be in effect until Monday, June 1, 2009.

For additional information, please call 705-424-1479, pick "1" for the flood information line or check our web site at: www.nvca.on.ca
